Arena Fonte Nova – Salvador

Until 2007, Salvador was the home of the Estádio Fonte Nova that had been erected in 1951 but was demolished and has been re-erected in recent years. The Arena Fonte Nova of today is a modern stadium with a roof made of light metal; it can accommodate 56,000 people.

Estádio Nacional – Brasília

Brasília's Estádio Nacional is the second largest stadium in Brazil. It was erected on the site of the former Mané Garrincha stadium that had been built in 1974 and almost completely demolished in 2010. Sustainability was an important factor in the rebuilding process, and the new stadium is now easily accessible with public transport. The roof is extendable and ensures that events can take place at any time and independent of the weather.

Arena Pantanal – Cuiabá

Visitors to the geographical centre of South America will not only find cattle farms and light industry but also the Arena Pantanal. It was built in 2010, in Cuiabá, a city with a population of only 554,000 and hence the smallest playing venue. The stadium can accommodate almost 43,000 people but the modular structure allows for the upper parts to be dismantled such that the capacity will eventually be smaller.

Estádio Beira-Rio - Porto Alegre

The Estádio Beira-Rio, or Estádio José Pinheiro Borda, as it is officially called, was built in 1969 and refurbished and extended in 2014. Seats, ramps and accesses are now protected by an innovative roof construction. The renovation work was carried out in several steps such that the stadium could be used even during that phase.

Arena Amazônia – Manaus

The Arena Amazônia is the stadium of Manaus, in northern Brazil, where the Rio Negro meets the Amazon. The stadium was built with sustainability in mind. For example, rain water is used to flush the toilets and to water the green, while the sun is used as an energy source. In addition, a special coating of the roof keeps the interior cool and saves energy.
